## Operation 911: No Suicide Pilots

by CAROL VALENTINE

October 6, 2001 -- There were no "suicide" hijackers aboard those jets on September 11. Advanced robotics technology, not the hijackers, was controlling the jets when they crashed. Fantastic? Before I explain, read about the history-making robot jet plane.

Global Hawk--Here You Have It ...

The Northrop Grumman Global Hawk is a robotized American military jet that has a wingspan of a Boeing 737.

The excerpts below were taken from an article entitled: "Robot plane flies Pacific unmanned," which appeared in the April 24, 2001 edition of Britain's International Television News:

"The aircraft essentially flies itself, right from takeoff, right through to landing, and even taxiing off the runway," according to the Global Hawk's Australian manager Rod Smith.

===

"A robot plane has made aviation history by becoming the first unmanned aircraft to fly across the Pacific Ocean.

"The American high-altitude Global Hawk spy plane made flew (sic) across the ocean to Australia, defence officials confirmed.
