For more than a half century, members of the Bush family have been setting policy and making money for all Americans. Let's look at the family that has had such an impact on the lives of hundreds of millions of people worldwide

It all started with Prescott Bush, George W. Bush's grandfather. In 1918 it is said that he [robbed the grave and stole the skull](#) of the Native American warrior Geronimo as part of an initiation into Yale's Skull and Bones Society. The Skull and Bones society has been very important to the Bush Family. George Bush Sr. and George W. Bush were also members of this [secret society](#).

Prescott Bush got into a little bit of trouble back in the 1940s. While American soldiers were fighting the Nazis in WWII, a few of the companies Prescott managed were [seized under the Trading with the Enemy Act](#) because they were selling fuel to and laundering money for Hitler's Nazis.
