**! Examination of Pentagon Crash Finds Large Plane, but Not Flight
AN INDEPENDENT ANALYSIS**

The Internet debate continues to rage about whether the damage to the Pentagon was caused by Flight 77, a Boeing 757. This is the most thorough examination of data that we have seen, and it concludes "(1) The hole in the Pentagon was not made by an aircraft, however, the hole is too small to have been made by a Boeing 757. (2) The damage to the Pentagon is about as extensive as one would expect from the crash of a large aircraft, although one that was somewhat smaller than a Boeing 757. (3) The public has absolutely no evidence that Boeing 757 debris has been recovered. (4) The photos of "the explosion" of flight 77 are a complete and utter fabrication. (5) No one knows who fabricated these photos, who fabricated them, and why the media is covering this up. (6) Although the middle level military are being honest about the September 11 attacks, factions within the media are deliberately lying. The reason is clear."
